Pocket Travel

Tiffany Zheng & Catherine Zhao

Project Idea

While traveling, it is difficult to find all our travel information in one place:

- Plane tickets
- Housing information
- Notes app to write down the places we want to go.

Address this pain point by combining the essential travel information into one easy app!

- Trips
  - List of Travel Details
    - Flight
    - Housing
   - Friends
    - Itinerary

Interesting Implementations

- Recycler View of Recycler Views:
  - List of Trips ⇸ List of Individual Travel Details
- Waze API
- Images API
- Editable travel details for each trip

Implemented Functions

- Add and Delete Trips
  - Each trip has image generated by API (Eiffel Tower for Paris)
- Add & Edit travel details for each trip
  - Flight Info
  - Housing Info (with directions through Waze)
  - Itinerary
  - Friends
